Jacob Heiser

Location: Wyoming MI (confirmed 2 days onsite in Lansing)

Work Experience

Python Software Developer | Full Sail University **Apr 2024 – May 2024**

- Designed Database with Data Transfers of Excel Data over to SQL organizing Data in separate Tables using Python to filter the Data with Nested for Loops and Conditional Statements
- Automated Scheduling system to optimize the handling of Staff Resources by Data Extraction and Restraints to manage a Dataset of 1000 Staff, 2000 Classes, and 5000 Staff Certifications
- Developed Data Transfer from SQL to Excel Sheets of finalized filtered data for Staff to have access to available data in an easy-to-read format.
- Created and updated Design Documents that explains project expectations for a 2-month period using technical writing skills.

Freelance Projects- Short term contracts

C# Game Developer | Rock Paper Sabotage **Jul 2024 – Oct 2024**

- Designed Authentication, Transport and Data Synchronization for players on same Server Network allowing players to join and compete against each other
- Implemented Git for version control, branch out from Main in case of detrimental bugs, and commit to Merges

Java Software Developer | Actualization **Aug 2022 – Sept 2022**

- Design Android mobile application with SQL Data Extraction for User Management handling different types of Users (Customer/Business) for log in, authentication and registration
- With OnEventListeners to commit Data Transfers of user entered data in text fields to SQL database to optimized management of Users

Java Software Developer | Guilty Pleasures **Aug 2021 – Sept 2021**

- Handle Data Extraction from external movie database with optional filters utilizing SQL logic through implementation of Queries, Subqueries, Join, and Where clauses
- Customized and designed a pop-up menu for Android application with Extends of different View types to showcase automated top recommendations of data within movie database by the utilization of object-oriented programming with Getters and Setters, and constructors
- Utilization of Git and Github to manage version control, progress in new Branches, and Merge code after debugging and testing

Programs

TEKsystems Rising Talent Program **Mar 2025 – May 2025**

- Attended daily lectures on different technologies as well as programming languages and habits with a focus on .NET development
- Utilized resources outside of daily lectures to induce self-learning as well as assignments that reinforced lectures
- Built new relationships with other developers as well as teaching staff.
- Completed a long-term project with a group of two other students that utilized React, HTML, Javascript, and CSS while using Git as a version control
- Completed a long-term solo project that manages an API where C#, ASP MVC, ASP Razor, HTML, JavaScript, and CSS were utilized
- Introduced to concepts such as Design Patterns, SQL security practices, and Unit Testing

Education

Bachelor Of Science in Computer Science **May 2020 – Dec 2023**
Full Sail University

Associates Of Science in Computer Science **Mar 2015 – May 2019**
Grand Rapids Community College

Skillsets

- Python
- Java
- C#
- SQL
- Visual Studio
- ASP MVC
- React
- HTML
- CSS
- JavaScript
- Technical Writing
